

6516209545.txt

Please allow satellite radio to continue providing local content. I am a truck driver and depend on having constant access to their reliable content in order to get me safely where I need to go. Local radio simply cannot provide the weather and traffic news that I need to have to perform my job quickly and safely. I pay to subscribe to this service for these reasons and feel that I should be allowed to continue using it in this way. Please reject petition 04-160 for subscribers like me.
